

Ask Always

What is Always Discreet for sensitive bladder?

ALWAYS DISCREET is a line of products from the Always family designed specifically for your sensitive bladder. This line of products includes liners, pads, pads+ and pants specially designed to help meet your bladder control needs, from those small little leaks up through heavier urine losses.

What does ‘for sensitive bladder’ mean?

The term ‘sensitive bladder’ describes a common condition that leads to an increased urgency and frequency of urination, also referred to as incontinence, overactive bladder, bladder weakness, etc. Women of all ages can be affected by this common phenomenon and the severity can vary from a few drops to larger quantities.

How can I tell the front from the back for Always Discreet Liners and Pads?

For ALWAYS DISCREET Liners and Pads, it does not matter which direction you place the product in your panties.

How are Always Discreet Liners and Pads different from menstrual products?

Similar to many menstrual liners and pads, ALWAYS DISCREET Liners and Pads contain Absorbent Gel Material (AGM). The AGM in Always Discreet Liners and Pads, however, was developed primarily for urine, as urine is a much less viscous (thinner) fluid than menstrual fluid. This type of AGM has also been used in some of our Pampers baby diapers to enable fluid distribution throughout the core and store it away from the surface.

What is the OdourLock Technology that is used in Always Discreet?

The OdourLock technology used in ALWAYS DISCREET is an exclusive technology that neutralises odours instead of simply masking them. This technology has separate mechanisms that work together to provide a neutralising and freshness benefit. There is a light scent, which you may notice, that comes from this special OdourLock technology and helps provide this freshness benefit.
